THE PRENATAL VISIT. The American College of Obstetricians and Gynecologists recommends that all pregnant women, regardless of age, be offered the option of diagnostic testing for Down syndrome and consider less invasive screening options. 7,8 Screening options have improved significantly with the introduction of first-trimester screening, which incorporates maternal age, nuchal translucency ...

Health Supervision for Children With Down Syndrome | From

Human embryonic development, or human embryogenesis, refers to the development and formation of the human embryo. It is characterised by the process of cell division and cellular differentiation of the embryo that occurs during the early stages of development. In biological terms, the development of the human body entails growth from a one-celled zygote to an adult human being.

Skin color is one of the most conspicuous ways in which humans vary and has been widely used to define human races. Here we present new evidence indicating that variations in skin color are adaptive, and are

related to the regulation of ultraviolet (UV) radiation penetration in the integument and its direct and indirect effects on fitness.
