The cam position sensor is critical to the proper functioning of the engine management system in its timing of engine events. The sensor delivers information on the position of the camshaft that actuates the engine's intake valves to the computer, which uses that information to deliver fuel and spark at the correct time.

The WOT Box makes no-lift shifting easy by cutting your engine's ignition for a very short period while you no-lift shift. No-lift shifting is keeping the gas down through the shift. The ignition cut allows the synchros in your transmission to mesh easily, reducing the chance of missing a gear and damaging your transmission.
