In psychology, the Asch conformity experiments or the Asch Paradigm refers to a series of studies directed by Solomon Asch studying if and how individuals yielded to or defied a majority group and the effect of such influences on beliefs and opinions.. Developed in the 1950s, the methodology remains in use by many researchers to the present day. Applications include the study of conformity ...

In ethics, value denotes the degree of importance of some thing or action, with the aim of determining what actions are best to do or what way is best to live (normative ethics), or to describe the significance of different actions. Value systems are proscriptive and prescriptive beliefs; they affect ethical behavior of a person or are the basis of their intentional activities.

This guide stresses the systematic causal analysis of gender inequality. The analytical questions raised and the readings listed consider why and how gender inequality arises, varies across and within societies, persists over generations, produces conformity by individuals and institutions, resists change, and sometimes changes dramatically.

A construction project is a team effort where the Owner, in effect, creates a partnership with all the Contractors to build a project. As with any good contract there are protections for all parties that the Owner will get the quality of project that they desire within the time limits and budget available; and the Contractor will be paid for the work satisfactorily completed.

Honors. Graduation with Honors. No more than 16 percent of the graduating seniors, who have completed at least 72 units in the University of California will receive honors: approximately 2 percent summa cum laude, 4 percent magna cum laude, and 10 percent cum laude. The student's cumulative record at the end of the final quarter is the basis for consideration for awarding Latin Honors.
