Our hallmark is the practical application of technical knowledge—a hands-on education that prepares you to address and solve the problems of our global society.

School of Technology | Michigan Technological University

The result of the function is a string of Length characters taken from Expression, starting at character position First_Character.. The form of First_Character and Length control how they are applied to Expression. Either argument can be a scalar or an array: If a scalar value is supplied for First_Character and Length, then those values are applied to all elements of Expression.
