Emotion is a mental state variously associated with thoughts, feelings, behavioural responses, and a degree of pleasure or displeasure. There is currently no scientific consensus on a definition. Emotion is often intertwined with mood, temperament, personality, disposition, and motivation.. Research on emotion has increased significantly over the past two decades with many fields contributing ...

Socioemotional selectivity theory (SST; developed by Stanford psychologist Laura L. Carstensen) is a life-span theory of motivation. The theory maintains that as time horizons shrink, as they typically do with age, people become increasingly selective, investing greater resources in emotionally meaningful goals and activities.

The broaden-and-build-theory could be defined as a model for explaining the mechanisms behind positive emotions in our minds and bodies, what their effects are, what the evolutionary reason is behind them and why studying them is so important for our well-being.. Studying emotions has always been a challenge. There are different points of view as to what is considered an emotion.
