Reuters Big Data for Education: Data Mining, Data

Programming with Big Data in R (pbdR) is a series of R packages and an environment for statistical computing with big data by using high-performance statistical computation. The pbdR uses the same programming language as R with S3/S4 classes and methods which is used among statisticians and data miners for developing statistical software. The significant difference between pbdR and R code is ...

Programming with Big Data in R - Wikipedia

With the exponential growth in the number of big data applications in the world, the demand and opportunity for testers who have knowledge of testing big data applications has increased. According to IDC Big data market is projected to be a \$50 billion industry by 2019.

Big data: changing the way businesses compete and operate

A supercomputer is a computer with a high level of performance compared to a general-purpose computer. The performance of a supercomputer is commonly measured in floating-point operations per second instead of million instructions per second (MIPS). Since 2017, there are supercomputers which can perform up to nearly a hundred quadrillion FLOPS. Since November 2017, all of the world's fastest ...

Assessing the Demand for Big Data and Analytics Skills, 2013-2020 April 2014

Assessing the Demand for Big Data and Analytics Skills

Selecting a Big Data Technology: Operational vs. Analytical. The Big Data landscape is dominated by two classes of technology: systems that provide operational capabilities for real-time, interactive workloads where data is primarily captured and stored; and systems that provide analytical capabilities for retrospective, complex analysis that may touch most or all of the data.
