Circumcision surgical procedure in males involves either a conventional "cut and stitch" surgical procedure or use of a circumcision instrument or device. In the newborn period (less than 2 months of age), almost all circumcisions are done by generalist physicians using one of three surgical instruments.

### **Circumcision surgical procedure - Wikipedia**

There is no standard circumcision procedure and the issue of standards has been a rallying call for years. At the Western Section American Urologic meeting in 2007 Dr Sam Kunin, who practices in Los Angeles, compared and contrasted clamps and discussed what he considered should be the minimal standards for circumcision.

[4] Mashongwa v Passenger Rail of South Africa 2016 (3) SA 528 (CC) para 52: "It must be emphasised that harm was reasonably foreseeable and PRASA had an actionable legal duty to keep the doors closed while the train was in motion. Not only has it expressly imposed this duty on itself, its importance was also alluded to in Metrorail. It is also commonsensical that keeping the doors of a ...

Significance. These findings have implications for personalized therapy of breast cancer. The late dissemination of cells that seed metastasis or local relapse suggests that the primary tumor genome can proxy for the genome of disseminated cells at the time of first diagnosis, supporting the use of genome sequencing to aid decisions about adjuvant therapy for primary breast cancer.
