The New York Times bestseller: the Nobel Prize-winning economist shows how today's crisis parallels the Great Depression and explains how to avoid catastrophe. With a new foreword for this paperback edition. In this major bestseller, Paul Krugman warns that, like diseases that have become resistant to antibiotics, the economic maladies that caused the Great Depression have made a comeback.

New trade theory (NTT) is a collection of economic models in international trade which focuses on the role of increasing returns to scale and network effects, which were developed in the late 1970s and early 1980s. New trade theorists relaxed the assumption of constant returns to scale, and some argue that using protectionist measures to build up a huge industrial base in certain industries ...
