A dry suit or drysuit provides the wearer with environmental protection by way of thermal insulation and exclusion of water, and is worn by divers, boaters, water sports enthusiasts, and others who work or play in or near cold or contaminated water. A dry suit normally protects the whole body except the head, hands, and possibly the feet. In hazmat configurations, however, all of these are ...

**Dry suit - Wikipedia**

Sidemount diving Sidemount diving is the practice of diving with two or more cylinders secured at the sides of the body in line with the torso and without cylinders on the diver's back. A common characteristic of the sidemount configuration is the use of bungee cords hooked over the cylinder valve to keep it tucked in close to the armpit.
