Free PDF Printer

What is FPDF? FPDF is a PHP class which allows to generate PDF files with pure PHP, that is to say without using the PDFlib library. F from FPDF stands for Free: you may use it for any kind of usage and modify it to suit your needs.

FPDF

The PDF Reader for the Connected World. Foxit Reader is the PDF Reader which enables you to become part of the connected world. Provide authors with comments on documents, be notified when new document versions become available, discuss interesting topics right in the document, or securely open protected documents.

Free PDF Reader & PDF Viewer Download | Foxit Software

In the example above, you see that you do not have to tell PHP which data type the variable is. PHP automatically converts the variable to the correct data type, depending on its value.

PHP Tutorial From beginner to master - dashmeshedu.com

PHP: Hypertext Preprocessor (or simply PHP) is a server-side scripting language designed for Web development. It was originally created by Rasmus Lerdorf in 1994; the PHP reference implementation is now produced by The PHP Group. PHP originally stood for Personal Home Page, but it now stands for the recursive initialism PHP: Hypertext Preprocessor.. PHP code may be embedded into HTML code, or ...

Reference is a relation between objects in which one object designates, or acts as a means by which to connect to or link to, another object. The first object in this relation is said to refer to the second object. It is called a name for the second object. The second object, the one to which the first object refers, is called the referent of the first object.
