SAR-EDU>Data processing>SAR Specific Data Formats>January 2012 For the current radar satellites the generic radar products are very similar in their characteristics, but have different names and acronyms.

### **SAR Specific Data Formats & SAR Data Processing**

Processing of SAR Data shows how SAR imagery is formed, how interferometry SAR images are created, and gives you a detailed mathematical description of different focussing algorithms with special emphasis in interferometry. The book describes in a comprehensive manner new methods and algorithms for interferometric processing of SAR data.

in Synthetic Aperture Radar (SAR) that is based on an adaptive processing of the digitally-spotlighted phase history data of individual targets. In the conventional SAR-ATR algorithms, the magnitude only or the complex SAR image of a test target chip is analyzed and compared with a set of reference target chips to determine the test target

Processing Sar Data Using Range Doppler And Chirp Scaling Algorithms Free Similar PDF's. Posted on July 11, 2017. Chirp scaling algorithm for processing SAR data with high squint of several spaceborne SAR systems. It consists basically of multiplying the SAR data in the range-Doppler domain with a quadratic phase function (chirp scaling) ...

Tutorial: Basic SAR Processing and Analysis Data Fusion SAR data complement other types of data by providing spatial information that other data do not contain. Conversely, SAR data do not have the

composition expressed in multispectral, optical data. Therefore, a combined SAR/optical data analysis is usually required.
