A Web crawler, sometimes called a spider or spiderbot and often shortened to crawler, is an Internet bot that systematically browses the World Wide Web, typically for the purpose of Web indexing (web spidering).. Web search engines and some other sites use Web crawling or spidering software to update their web content or indices of others sites' web content.

Background. I have had more than a curious interest for a while, in the concept of a sock puppet army and web-bots, and have carried out a lot of R&D into the area, including reading some useful background research (here for example).If you are not familiar with the term, it refers to 'the use of a fake identity to artificially stimulate demand for a product, brand or service'.
