De Broglie, in his 1924 PhD thesis, proposed that just as light has both wave-like and particle-like properties, electrons also have wave-like properties. By rearranging the momentum equation stated in the above section, we find a relationship between the wavelength,  $\lambda$  associated with an electron and its momentum,  $p$ , through the Planck constant,  $h$ :  $h = p\lambda$ .

The Twelfth International Congress on Artificial Materials for Novel Wave Phenomena "Metamaterials'2018", will comprise a 4-day Conference (27-30 August), and a 2-day Doctoral School (31 August-1 September). Organized by the METAMORPHOSE VI AISBL ([www.metamorphose-vi.org](http://www.metamorphose-vi.org)) and hosted by Aalto University (Espoo, Finland), this Congress follows the success of Metamaterials 2007-2017 and ...

Thomas Young FRS (13 June 1773 – 10 May 1829) was a British polymath and physician. Young made notable scientific contributions to the fields of vision, light, solid mechanics, energy, physiology, language, musical harmony, and Egyptology. He "made a number of original and insightful innovations" in the decipherment of Egyptian hieroglyphs (specifically the Rosetta Stone) before Jean-François ...

Media and Elections. The media are essential to democracy, and a democratic election is impossible without media. A free and fair election is not only about the freedom to vote and the knowledge of how to cast a vote, but also about a participatory process where voters engage in public debate and have adequate information about parties, policies, candidates and the election process itself in ...

We report here the development of a new concept of scanning wave photopolymerization (SWaP) using spatiotemporal scanning of focused guided light, triggering a mass flow in the film as the polymerization reaction propagates, which then results in LC alignment coincident with the incident light patterns (). A desired target pattern of molecular alignment is thus achieved in a single step by ...
