RADAR HANDBOOK Editor in Chief MERRILL I. SKOLNIK

A key development was the cavity magnetron in the UK, which allowed the creation of relatively small systems with sub-meter resolution. Britain shared the technology with the U.S. during the 1940 Tizard Mission.. In April 1940, Popular Science showed an example of a radar unit using the Watson-Watt patent in an article on air defence. Also, in late 1941 Popular Mechanics had an article in ...

Radar Fundamentals - Naval Postgraduate School

Radar cross-section (RCS) is a measure of how detectable an object is by radar. A larger RCS indicates that an object is more easily detected. An object reflects a limited amount of radar energy back to the source.

Radar cross-section - Wikipedia

Introduction. The word â€œRADARâ€• is an acronym for RAdio Detection And Ranging. As it was originally conceived, radio waves were used to detect the presence of a target and to determine its distance or range. The reflection of radio waves by objects was first noted more than a century ago.

Radar (stacja radiolokacyjna) â€” urzÄ...dzenie sÄ, uÄ¼Ä...ce do wykrywania â€” za pomocÄ... fal radiowych â€” obiektów powietrznych, nawodnych oraz lÄ...dowych takich jak: samoloty, Å›migÅ, owce, rakiety, statki (rÄ³wnie¼ chmury oraz obiekty terenowe), pozwalajÄ...ce na okreÅ›lenie kierunku, odlegÅ, oÅ›ci, a takÅ¼e rozmiarów obiektu, a w radarach dopplerowskich takÅ¼e do pomiarów prÄ™dkoÅ›ci ...

Radar â€” Wikipedia, wolna encyklopedia

Radar er en forkortelse for RAdio Detection And Ranging. Grundprincippet i en radar er, at et radarsignal (kort impuls med en hÅ, j frekvens, typisk 1-40 GHz) udsendes fra en antenne i Å›n retning. Hvis radarstrÅ¶len rammer en genstand (f.eks. et fly), reflekteres en lille del af strÅ¶len og opfanges af modtageren gennem antennen. Signalet forstÅ¶rkes og ender som et 'blip' pÅ¶ en skÅ¶rm.

Radar - Wikipedia, den frie encyklopædi

Il radar (acronimo dell'inglese «radio detection and ranging», in italiano: "radiatorilevamento e misurazione di distanza") è un sistema che utilizza onde elettromagnetiche appartenenti allo spettro delle onde radio o microonde per il rilevamento e la determinazione (in un certo sistema di riferimento) della posizione (coordinate in distanza, altezza e azimuth) ed eventualmente della ...

Radar - Wikipedia

Un radar météorologique est un type de radar utilisé en météorologie pour repérer les précipitations, calculer leur déplacement et déterminer leur type (pluie, neige, grêle, etc.). La structure tridimensionnelle des données obtenues permet également d'informer les mouvements des précipitations dans les nuages et ainsi de repérer ceux qui pourraient causer des dommages.

Radar meteorológico – Wikipedia

El radar (término derivado del acrónimo inglés radio detection and ranging, «detección y medición de distancias por radio») es un sistema que usa ondas electromagnéticas para medir distancias, altitudes, direcciones y velocidades de objetos estáticos o móviles como aeronaves, barcos, vehículos motorizados, formaciones meteorológicas y el propio terreno.

Radar - Wikipedia, la enciclopedia libre

Die synthetische Apertur. Wenn von einem Radar mit synthetischer Apertur gesprochen wird, so wird meist das sogenannte focused SAR gemeint: eine zusätzliche Fokussierung der einzelnen Signale wird dadurch erreicht, dass Phasenunterschiede, die durch Laufzeitunterschiede zwischen den einzelnen Antennenpositionen entstehen, durch den Signalprozessor ausgeglichen werden.

Synthetic Aperture Radar – Wikipedia
