A computer is a device that can be instructed to carry out sequences of arithmetic or logical operations automatically via computer programming. Modern computers have the ability to follow generalized sets of operations, called programs. These programs enable computers to perform an extremely wide range of tasks.

The eight queens puzzle is the problem of placing eight chess queens on an  $8 \times 8$  chessboard so that no two queens threaten each other; thus, a solution requires that no two queens share the same row, column, or diagonal. The eight queens puzzle is an example of the more general  $n$  queens problem of placing  $n$  non-attacking queens on an  $n \times n$  chessboard, for which solutions exist for all natural ...
