

### **strong versus weak acids pdf**

How do strong and weak acids differ? Use lab tools on your computer to find out! Dip the paper or the probe into solution to measure the pH, or put in the electrodes to measure the conductivity. Then see how concentration and strength affect pH. Can a weak acid solution have the same pH as a strong acid solution?

### **Acid-Base Solutions - Acids | Bases | Solutions - PhET**

An acid is a molecule or ion capable of donating a hydron (proton or hydrogen ion H<sup>+</sup>), or, alternatively, capable of forming a covalent bond with an electron pair (a Lewis acid).. The first category of acids is the proton donors or Brønsted acids. In the special case of aqueous solutions, proton donors form the hydronium ion H<sub>3</sub>O<sup>+</sup> and are known as Arrhenius acids.

### **Acid - Wikipedia**

An organic acid is an organic compound with acidic properties. The most common organic acids are the carboxylic acids, whose acidity is associated with their carboxyl group "COOH. Sulfonic acids, containing the group "SO<sub>2</sub>OH, are relatively stronger acids. Alcohols, with "OH, can act as acids but they are usually very weak. The relative stability of the conjugate base of the acid ...
