

the hempcrete book designing pdf

Hempcrete Hempcrete is a mixture of chopped hemp, hydrated lime and a small amount of either Portland cement or quick-set gypsum, and possibly includes sand or pozzolans. A reaction between the lime and the hemp results in a very lightweight material that still has reasonable compressive strength.

Green Home Building: Light-weight Concrete

If you are a designer or builder specializing in green building, itâ€™s only a matter of time before you are approached by a client who suffers from multiple chemical sensitivity. A typical request might go like this: â€œMany ordinary building materials can make me sick. Iâ€™m looking for someone to ...
